# Old UI Design

# ❌ Bad Design (Old UI)

- **Flat & Dull UI – Background plain-aa irundhuchu, no personality.**
- **Poor Profile Picture Placement – Small size, rectangular frame, outdated look.**
- **Low Contrast & Readability Issues – Light purple background + white text → contrast kammi, text blend aayiduchu.**
- **Poor Visual Hierarchy – Username/designation same size & color, no clear importance.**
- **Unstructured Layout – Stats (Posts, Likes, Following) not highlighted, navigation hard.**
- **Single Column Post Display – Posts stacked one below another, cluttered feel.**

# Modified UI Design

# ✅ Good Design (Modified UI)

- **Header Background Image – Profile-ku behind nice image, engaging look.**
- **Profile Picture Integration – Circular, enlarged, overlaps header → modern feel.**
- **Improved Layout & Typography – Proper spacing, central alignment, readable fonts.**
- **Colour & Contrast – White background + pink accents for buttons, bold fonts for username & stats.**
- **Profile Stats Display – Posts, Followers, Following prominent-aa show pannirukanga.**
- **Call-to-Action Buttons – Follow & Message buttons bigger, attractive.**
- **Grid-Based Image Layout – Posts arranged in neat grid, consistent aspect ratio.**
